Subject/Title: New Overnight Express Bus Service: Connecting San Ysidro and Downtown San Diego

Starting Jan. 26, the San Diego Metropolitan Transit System (MTS) will start running a new, overnight bus service between San Ysidro and downtown San Diego. [Route 910](#) will be an express route, serving limited stops between the U.S.-Mexico border and downtown.

The new Route 910 will help provide a link along the busiest transit corridor in the region during the hours when the UC San Diego Blue Line Trolley cannot run service.

Route 910 will:

- Operate from approximately 12:30 – 5 a.m., daily
- Run every 30 minutes
- Have stops at: San Ysidro Transit Center, Iris Avenue Transit Center, Palomar Street Transit Center, 24<sup>th</sup> Street Transit Center, near the Harborside and Barrio Logan Trolley Stations, and multiple stops in downtown San Diego.

A one-way fare will be \$2.50 for Adult riders, and \$1.25 for senior, disabled and Medicare riders.

Riders can learn more about the new route on the [MTS website](#).

### **Frequently Asked Questions:**

#### **1. Why not run 24/7 Trolley service?**

MTS shares part of our rail line with heavy freight companies that operate in the late night and early morning hours. Federal regulations limit our ability to run service at the same time heavy freight is operating on our tracks.

#### **2. Where does the new overnight express route run?**

Route 910 will start at the San Ysidro Transit Center, with stops at or near the Iris Avenue Transit Center, Palomar Street Transit Center, 24<sup>th</sup> Street Transit Center, near the Harborside and Barrio Logan Trolley Stations, and multiple stops in downtown San Diego.

**3. What is the schedule for Route 910?**

Service on Route 910 is available from approximately 1:30 to 4 a.m. traveling north from the San Ysidro Transit Center to downtown San Diego, and from approximately 12:30 – 3:30 a.m. when traveling south from Downtown San Diego to San Ysidro.

The Route will run on a 30-minute frequency in both directions and has about a 50-minute ride time between San Ysidro and Downtown San Diego. For a detailed schedule, please visit [www.sdmts.com/910](http://www.sdmts.com/910).

**4. Why does Route 910 not serve every Trolley stop?**

The route will serve limited stops in order to help make the route time competitive and more effective for users.

Online and in-person surveys of community members helped determine which stops were most desired by riders expected to use the new route, as well as Trolley data from existing late-night and early morning UC San Diego Blue Line stops.

**5. Why does Route 910 run every 30 minutes?**

Historically, the last trips on the UC San Diego Blue Line have run on a 30-minute frequency. MTS mimicked that schedule for the launch of overnight service. MTS will be looking closely at ridership numbers throughout the first few months of use and assess if extra capacity is needed due to ridership levels.

**6. How much does it cost to ride Route 910?**

Route 910 costs the same as other standard MTS services - \$2.50 for a one-way fare for Adult riders, or \$1.25 for Senior, Disabled and Medicare riders.

Riders who pay with PRONTO or use contactless payments with a credit or debit card get free transfers for two hours, while riders using cash will have to pay again if transferring to another bus route or Trolley line.

**7. Is the route safe to use?**

Riders should save the number to security dispatch (619-595-4960) to text or call if assistance is ever needed. Security is available 24/7. Overnight:

- MTS will have a dedicated security team that will patrol all Route 910 stops during hours of operation.
- Dedicated security staff are assigned at the 12<sup>th</sup> & Imperial Transit Center and the San Ysidro Transit Center during Trolley operation hours (4:30 a.m. to 1:00 a.m.).
- In addition to the Route 910 roaming security team, there is a mobile security team dedicated to Trolley stations in downtown San Diego, and another team to UC San Diego Blue Line stations in South County (from Barrio Logan to San Ysidro)

In addition to security personnel, MTS is in process of adding solar lighting to Route 910 stops in Barrio Logan (all other stops are located within existing transit centers with lighting 24/7).
